# How to upgrade from the SD card

Note: The patch is suitable for C1 and FI9816P <u>produced after March 2015</u>. You can get the approximate date from the SN.

1. Please create a new folder in the root direction of the SD card, and name it as "ipc_recover_image_bin"

192.168.1.100	2015/10/15 15:46	文件夹
192.168.1.101	2015/9/17 16:38	文件夹
192.168.1.141	2015/8/31 10:14	文件夹
C1_0000003EC94F	2015/9/17 14:08	文件夹
C2	2015/9/28 11:46	文件夹
dir	2015/10/13 11:30	文件夹
FI9826W_00626E5612E6	2015/8/27 10:29	文件夹
ipc_recover_image_bin	2015/10/29 16:53	文件夹

2. Copy the "recover_image.bin" file to "ipc_recover_image_bin" folder. Please don't change the name of the "recover_image.bin" file.

3. Please insert the SD card to the camera, turn off the camera and reboot it.

4. Please wait for 3 minutes around, you will hear "Hello, Foscam" which means the camera finishes upgrading and reboots again.

5. Take out the SD card, delete the "ipc_recover_image_bin" folder and "recover_image.bin" file, otherwise,the camera will be upgrade again when it reboots next time.

Please note: The patch is version 2.*.2.16, it is only suitable for C1, FI9816P.
